Course content
Individuals involved in the process of new venture creation need to make frequent decisions about what opportunities are worth exploring and, among the various solutions available, which opportunities are worth further exploitation. Based on academic research on entrepreneurship, the objective of the course is to provide students with knowledge of how to discover, sample and evaluate new business opportunities. The course will also provide students with knowledge about how to make decisions in uncertain environments and how to initiate and carry out teamwork in the creation of new ventures.

The course will consist of four parts:
1) Introduction to entrepreneurial decision making, were effectuation theory is introduced and discussed. In this part the students get to know principles and methods for making decisions in the entrepreneurial process. There will also be an introduction to important key concepts in the entrepreneurial process, such as opportunity recognition, finding and allying with partners, team building, industry and market analysis, resource acquisition and access to finance.

2) Application of methods for discovering, sampling, and evaluating new business opportunities.

3) Evaluating and applying decision criterion for new business opportunities. In this part the students will practice effectuation theory in relation to new business opportunities and how new ventures should be created. The students are working in teams and cases are formulated, presented, and discussed in class.

4) Initiation and carrying out teamwork in their practice of new venture creation. In this part the students are working in teams during the course. Here they will practice teamwork and how it affects the creation of a new venture. Examples of issues addressed are how to handle conflicts between team members and the different roles people perform in teams.

Course design
The range of teaching methods varies, but primarily consists of lectures, case discussions, teamwork and group discussions. Assigned readings, in the form of textbooks and research articles, are an integral part of the teaching methods.
