Learning outcomes

The course emphasizes the central concepts and traditions in organization studies and aims to equip students with skills for investigating and researching organizational practice in particular in the areas of leadership and the management of change. Above all, the course seeks to develop analytical (problem-identifying) and decision making (problem-solving) skills required to manage and lead in complex situations as well as to develop methodological proficiencies. The course emphasizes the significance of the quest for leadership whether one works in a specialist role or in a formal leadership position. In addition to investigating various aspects of leadership and change management, the course also underlines the importance of analyzing and understanding organizations as multiple perspective phenomena.

Course content

The main objectives of the course are to train, develop and mentally prepare the students to take active participation as leaders as well as co-workers in various organizations. This will entail the idea that organizations can be managed and studied through different perspectives which offer possibilities for reflection and different understandings of organizational phenomena. A topic in particular focus will be leadership, the understanding of which is essential whether one works in a specialist role or in a formal leadership position. In addition to investigating various aspects of leadership, the course also underlines the importance of analyzing and understanding organizations as multiple perspective phenomena. Topics also covered will include human resource management, motivation, managing change and identity in organizations.

The course is built around two main components; the first of these is theoretical, where students gain knowledge on different theoretical perspectives on leading organizations and the management of change. The second part of the course is

geared towards methodology whereby the students will draw on a selected case study organization of their choice; formulate a research problem and analyse empirical material. This course content and structure will prepare students in roles as practitioners as well as furthering their skills in studying and investigating organizational phenomena.

Course design

The goal of developing an advanced understanding of organisations in practice is furthered throughout the course by lectures and case analysis through seminars. The methodological element of the course is also strengthened through the students selecting their real live case organisation for further exploration and investigation. The teaching is based consistently on active student participation at theory and case seminars.

Assessment

The course will be examined by means of a written examination undertaken at the end of the course. This examination will consist of both case questions and theory questions. Students will also be examined by means of their performance during the seminars and a group assignment. Attendance at the seminars will be compulsory.

Subcourses that are part of this course can be found in an appendix at the end of this document.
