### General Information

*Language of instruction:* Swedish

*Main field of studies*

Environmental Science

*Depth of study relative to the degree requirements*

A1N, Second cycle, has only first-cycle course/s as entry requirements

### Learning outcomes

The aim of the course is that students, on its completion, shall have attained the following knowledge and skills:

*Knowledge and understanding*

On completion of the course, the students shall

? be able to apply and use the knowledge and skills they have acquired during previous studies

? have had the opportunity to critically assess the professional activities of environmental scientists in the field of the internship

### *Competence and skills*

On completion of the course, the students shall be able to

? independently process a problem or problem area within or adjacent to

environmental science

? design and follow a time plan in consultation with others

? in speech and writing report clearly and discuss his or her conclusions and the knowledge and arguments on which they are based

### *Judgement and approach*

On completion of the course, the students shall be able to

? identify the personal need for further knowledge and take responsibility for their

ongoing learning

## **Course content**

The course consists of planning, execution and evaluation of an internship of 9 weeks at a workplace including duties associated with the student's training. A supervisor will be appointed at the workplace. The student is to keep a journal during the internship.

## **Course design**

During the internship, the student is to execute an independent minor project and participate in the daily work at the workplace. The project should be presented in speech and writing to the supervisor at the workplace. The supervisor is to certify in writing that the project and internship have been properly executed. The student is to keep a journal throughout the internship. It is to be summarised in a written report to be submitted to the course director at the end of the internship.

## **Assessment**

The assessment is based on the supervisor's certificate and the student's written report.

*Subcourses that are part of this course can be found in an appendix at the end of this document.*

## **Grades**

Marking scale: Fail, Pass.

For a Pass on the course as a whole, the students must have their written report and supervisor's certificate approved by the course director.

## **Entry requirements**

To be admitted to the course, students must possess knowledge equivalent to 75 credits in the main field of environmental science.
