

**LUND**  
UNIVERSITY

School of Economics and Management

**NEKN51, Economics: Economic Evaluation, 7.5 credits**  
*Nationalekonomi: Samhällsekonomisk lönsamhetsbedömning, 7,5*  
*högskolepoäng*  
Second Cycle / Avancerad nivå

---

### Details of approval

The syllabus was approved by The Board of the Department of Economics on 2011-06-07 and was last revised on 2019-11-05. The revised syllabus applies from 2020-08-31, autumn semester 2020.

### General Information

This is a single subject master course in economics belonging to the 'Public Economics' specialisation. The course is either obligatory or optional within a number of master programmes at Lund University.

*Language of instruction:* English

Teaching may be in Swedish if all registered students have a good knowledge of Swedish.

*Main field of studies*

Economics

*Depth of study relative to the degree requirements*

A1N, Second cycle, has only first-cycle course/s as entry requirements

### Learning outcomes

#### Knowledge and understanding

Students shall:

- have acquired a good knowledge of relevant micro and welfare economic theory,
- be able to identify and quantify costs and benefits to society as a whole,
- be able to estimate social costs and benefits in monetary terms using appropriate valuation techniques, and to organise these estimates into social net present values for decision purposes,
- be able to assess relevant social economic aspects in reports, regulations, proposals, etc.,

- be able to handle risk and uncertainty in evaluation methods,
- be able to apply their knowledge to issues and problems not treated to in the course.

### **Competence and skills**

Students shall have the ability to independently:

- apply a social view to various economic problems,
- use appropriate micro and welfare economic theory,
- assess programs and projects using the most appropriate method of evaluation,
- implement evaluation methods using a high degree of economic knowledge,
- successfully identify, analyse and assess the socio-economic aspects of proposals, programs and projects,
- communicate their findings to decision makers and others, both orally and in writing.

### **Judgement and approach**

Students shall have developed the ability to pursue further studies in the subject and should be able to independently evaluate the costs to society of different kinds of projects and proposals.

### **Course content**

This course deals with the problems of identifying, quantifying and evaluating the advantages and drawbacks to society as a whole of various kinds of policy changes. The main focus is on valuation models for non-market goods, where the foundations of welfare economics will serve as a base for the evaluations methods. Examples are taken from environment, transport and health economics.

### **Course design**

1. Teaching: Tuition consists of lectures and seminars.

### **Assessment**

1. Examination: The examination consists of a written exam and various forms of home assignments. The written exam takes place at the end of the course. There will be further opportunities for examination close to this date. Points gained on the home assignments count at exams during the current term.
2. Limitations on the number of examination opportunities: –

The University views plagiarism very seriously, and will take disciplinary action against students for any kind of attempted malpractice in connection with examinations and assessments. Plagiarism is considered to be a very serious academic offence. The penalty that may be imposed for this, and other unfair practices in examinations or assessments, includes suspension from the University for a specified period.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

*Subcourses that are part of this course can be found in an appendix at the end of this document.*

## Grades

Marking scale: Fail, E, D, C, B, A.

1. Grading: Grade (Definition), Points or percentage out of maximum points, Characteristic

A (Excellent), 85–100, A distinguished result that is excellent with regard to theoretical depth, practical relevance, analytical ability and independent thought.

B (Very good), 75–84, A very good result with regard to theoretical depth, practical relevance, analytical ability and independent thought.

C (Good), 65–74, The result is of a good standard with regard to theoretical depth, practical relevance, analytical ability and independent thought.

D (Satisfactory), 55–64, The result is of a satisfactory standard with regard to theoretical depth, practical relevance, analytical ability and independent thought.

E (Sufficient), 50–54, The result satisfies the minimum requirements with regard to theoretical depth, practical relevance, analytical ability and independent thought, but not more.

U (Fail), 0–49, The result does not meet the minimum requirements with regard to theoretical depth, practical relevance, analytical ability and independent thought.

Students have to receive a grade of E or higher in order to pass a course.

2. Weighting grades from different parts of the course: –

3. Grading scales for different parts of the course: –

## Entry requirements

Students admitted to the Master programme in Economics are qualified for this course. For other students at least 90 ECTS-credits in economics at the undergraduate level are needed for admission to all master courses in economics.

## Further information

1. Transitional regulations: This course replaces NEKM38 "Economic Evaluation".

2. Limitations in the period of validity: –

3. Limitations: This course may not be included in the same degree as NEK664 "Cost-Benefit Analysis" or NEKM38 "Economic Evaluation".

4. Similar courses: –

5. Limitations in renewed examination: –
