Course content
The course deals with qualitative research methods in the social sciences and especially common methods in strategic communication. The course starts with discussing the relationship between choice of theoretical perspective, research problem and research question in different qualitative traditions. Thereafter the course provides the student with an overview of various qualitative methods such as observation and interview, and how they are used within strategic communications. The course will also develop student’s skills in applying various qualitative methods. Special emphasis is given to analysis and reporting of qualitative studies. As well theoretical knowledge as practical skills in qualitative methods is treated. The idea is the knowledge should be the basis for the Master’s thesis.

Course design
Teaching consists of lectures, workshops and seminars. Attendance at workshops is compulsory unless there are special grounds. An alternative form or date for compulsory components is offered to students who are not able to complete a compulsory component owing to circumstances beyond their control, e.g. accident, sudden illness or similar. This also applies to students who have missed teaching because of activities as a student representative.

Assessment
The course is assessed through one exam (7.5 credits).
Three opportunities for examination are offered in conjunction with the course: a first examination and two re-examinations. Within a year of the end of the course, two further re-examinations on the same course content are offered. After this, further re-examination opportunities are offered but in accordance with the current course syllabus.
The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.
Subcourses that are part of this course can be found in an appendix at the end of this document.
Grades

Marking scale: Fail, E, D, C, B, A.
The highest grade is A and the lowest passing grade is E. The grade for a non-passing result is Fail. The student’s performance is assessed with reference to the learning outcomes of the course. For the grade of E the student must show acceptable results. For the grade of D the student must show satisfactory results. For the grade of C the student must show good results. For the grade of B the student must show very good results. For the grade of A the student must show excellent results. For the grade of Fail the student must have shown unacceptable results.
The course grade is set by the students grade on the home exam.
At the start of the course students are informed about the learning outcomes stated in the syllabus and about the grading scale and how it is applied in the course.
