The syllabus is an old version, approved by the board of the Department of Service Management and Service Studies on 2015-01-27 and was last revised on 2017-01-18. . The revised syllabus applied from 2017-02-01. , autumn semester 2017.

## **General Information**

The course may not be included in a main field of study. The course is included in the second semester of the Master of Science programme in Service Management.

Language of instruction: English

Main field of studiesDepth of study relative to the degree<br/>requirements-A1F, Second cycle, has second-cycle<br/>course/s as entry requirements

### Learning outcomes

For a Pass on the course, students shall

#### Knowledge and understanding

- analyse purchasing, cost structures and different types of relations in supply chains, focusing on transport and services related to transport,
- critically analyse and contextualise supply chain management and related concepts,
- analyse, make relevant assumptions about and assess alternatives to supply chains.

#### Competence and skills

- analyse purchasing, cost structures and different types of relations in supply chains, focusing on transport and services related to transport,
- critically analyse and contextualise supply chain management and related concepts,
- analyse a supply chain and make relevant assumptions.

#### Course content

The aim of the course is to enable students to develop and specialise their understanding of the control and analysis of supply chains, focusing on service logistics. This type of knowledge is relevant for work with operational and strategic issues within logistics.

The course addresses the following topics:

Actors and costs in supply chains (2.5 credits): This component enables the students to develop their understanding of different actors and roles in the supply chain and knowledge of how to perform financial analyses of products.

**Control of supply chains** (2.5 credits). This component enables the students to learn the design and global control of supply chains, to analyse service levels, to make calculations for stock control, and learn the basics of purchasing and service logistics.

**Concept specialisation** (2.5 credits). This component enables the students to analyse and assess specialised concepts of logistics, focusing on understanding concepts from applied as well as scholarly perspectives.

### Course design

The teaching consists of lectures, seminars, workshops and field trips.

Unless there are valid reasons to the contrary, compulsory participation is required at seminars. Students who have been unable to participate due to circumstances such as

accidents or sudden illness will be offered the opportunity to compensate for or retake compulsory components. This also applies to students who have missed teaching because of activities as a student representative.

#### Assessment

The assessment is based on the presentation and submission of two assignments and a written exam: Actors and costs in the supply chain is assessed by a group assignment, Control of supply chains by an individual assignment and Concept specialisation by a written exam.

The following opportunities for assessment shall be offered for each course/module with identical content: a first examination, a re-sit close to the first examination and a second re-sit for courses that have been completed in the past academic year. Two further re-examinations on the same course content are offered within a year of the end of the course. After this, further re-examination opportunities are offered but in accordance with the current course syllabus.

Subcourses that are part of this course can be found in an appendix at the end of this document.

### Grades

Marking scale: Fail, E, D, C, B, A.

The grade for a no pass is Fail. The student's performance is assessed with reference to the learning outcomes of the course. For the grade of E, the student must show acceptable results. For the grade of D the student must show satisfactory results. For the grade of C the student must show good results. For the grade of B the student must show very good results. For the grade of A the student must show excellent results. For the grade of Fail the student must have shown unacceptable results.

For a grade A on the whole course, the student must have been awarded this grade on at least two of the three components graded A to E, at least a grade of B on the third component (if the grade of A has not been obtained on all components), participated in all compulsory components and obtained a Pass at the first examination opportunity. For the other grades, students must have been awarded a corresponding combination of grades, i e at least B-B-C for a grade of B, etc

At the start of the course, students are informed of about the learning outcomes stated in the syllabus and about the grading scale and how it is applied in the course.

## Entry requirements

To be admitted to the course, the student must have passed 30 credits of the Master of Science programme in Service Management (SASMA).

### Further information

This course replaces Logistics and Supply Chains, SMMP26, 7.5 credits and may not be included together with this course in a degree.
