

**LUND**  
UNIVERSITY

Faculty of Social Sciences

## **STVC55, Political Science: Environmental Governance, 7.5 credits**

*Statsvetenskap: Governance i miljöpolitiken, 7,5 högskolepoäng*  
**First Cycle / Grundnivå**

---

### **Details of approval**

The syllabus was approved by the board of the Department of Political Science on 2011-11-08 and was last revised on 2016-11-28. The revised syllabus applies from 2017-01-16, spring semester 2017.

### **General Information**

This course in Political Science is offered to undergraduate and exchange students at Lund University. Lectures and seminars are conducted in English, and examination papers are written in English.

*Language of instruction:* English

*Main field of studies*

Political Science

*Depth of study relative to the degree requirements*

G2F, First cycle, has at least 60 credits in first-cycle course/s as entry requirements

### **Learning outcomes**

On completion of the course, students shall be able to

#### **Knowledge and understanding**

- an understanding of key issues in the study of environmental politics and governance
- knowledge of key theories, frameworks, and methods used in the study of environmental politics

## Competence and skills

- the ability to compare and reflect on key theories, frameworks and frameworks used in the study of environmental politics
- the ability to apply these theoretical and methodological tools in empirical studies of environmental issues
- the ability to contribute to a common learning environment and to group dynamic aspects of learning
- the ability present her/his analysis in written and oral form that corresponds to academic standards.

## Course content

The aim of the course is to introduce students to the realm of environmental politics as a topic of scientific inquiry. It is designed for students who have basic knowledge of environmental issues, but have a broad knowledge of political science theory and methods. The course begins by introducing four different world-views that can be used as ideal-type categories to understand the different philosophies driving environmental politics, and that serve as a basis for reflection in further course work. To give the students an impression of the diversity inherent to environmental politics, the course then continues by covering a range of empirical cases (oceans, forests, climate etc.) at local, national and international governance levels. It discusses actors, institutions, policies, and their interaction with each other, and importance in the political process. In parallel to the empirical cases, the course also introduces a set of theories and analytical frameworks that are commonly used to study environmental politics, and discusses their application in scientific as well as policy relevant contexts.

## Course design

The course consists of a series of lectures and seminars. Students are expected to participate actively in these sessions, and prepare oral and written presentations on specific topics.

## Assessment

The final assessment is based on a paper that is presented and evaluated at a seminar. In addition to the regular examinations, two extra examinations will be organised each term.

*Subcourses that are part of this course can be found in an appendix at the end of this document.*

## Grades

Marking scale: Fail, E, D, C, B, A.

The grades awarded are A, B, C, D, E or Fail. The highest grade is A and the lowest passing grade is E. The grade for a non-passing result is Fail.

The student's performance is assessed with reference to the learning outcomes of the course. For the grade of E the student must show acceptable results. For the grade of D the student must show satisfactory results. For the grade of C the student must

show good results. For the grade of B the student must show very good results. For the grade of A the student must show excellent results. For the grade of Fail the student must have shown unacceptable results.

At the start of the course students are informed about the learning outcomes stated in the syllabus and about the grading scale and how it is applied in the course.

### **Entry requirements**

To be eligible for the course the student must have the equivalence of one year (60 credits) of coursework in Political Science.
