Kursens mål

The over-all objective with the course is to give a wide knowledge of theories of strategy and their application in models, concepts, and tools and techniques in various contexts. In order to fulfil this objective the course takes its departure in historical and contemporary theories, while theories about strategy in highly unpredictable and volatile contexts will be introduced in the end of the course.

A passing grade on the course will be awarded to students who:

Kunskap och förståelse

- Have knowledge of the main theoretical perspectives of strategy
- Understand different theories' historical back ground and the most important concepts, models, and tools and techniques for strategic analysis.

Färdighet och förmåga

- Are able to identify, analyse and find solutions to problems in relation to strategic management issues in single business firms as well in multi business firms in their industrial contexts, applying industrial organization theories and the resource based view.

Värderingsförmåga och förhållningssätt

- Are able to identify current trends in strategic management including new forms for competition and new forms of organization and leadership
- Are able to present and defend their conclusions from their case work.

Kursens innehåll

The aim is to promote theoretical knowledge as well as applied knowledge adapted to different contexts regarding strategic management from a general manager's perspective. The aim is further to develop the students' ability to analyse the strategies of an organisation and the strategy formulation and implementation processes.

Following a general introduction to strategic management, traditions and trends in business policy, emphasising the perspective of the general manager, the following topics are covered:

- Definitions and models of strategy: industrial organization (IO) and resource based view (RBV), new approaches to strategy: strategies in hypercompetitive environments, standard setting and time pacing.
- Industrial organization perspective on strategy. Industry and competitive analysis - tools and models.
- Strategy in single-business companies, IO theories: traditional and contemporary state
- Strategy in single-business companies - RBV theories: traditional and contemporary state.
- The evolution of the modern industrial enterprise. Strategy in multi-business companies - concepts and tools. International and global businesses.
- New approaches to strategy. Technology lock-in, the standard race.
- New approaches to strategy: strategy in highly volatile contexts, hyper competition and time pacing.

Kursens genomförande

The course is conducted in the form of lectures as well as case discussions and a presentation made by the students. Student groups consisting of about four participants analyze and present a case. The course design is based on active student participation and students are expected to attend all activities.

Kursens examination

See appendix including examination sessions. (Will be attached to the curriculum automatically in the system).

Om så krävs för att en student med varaktig funktionsnedsättning ska ges ett likvärdigt examinationsalternativ jämfört med en student utan funktionsnedsättning, så kan examinator efter samråd med universitetets avdelning för pedagogiskt stöd fatta beslut om alternativ examinationsform för berörd student.
