1 Note: Shared first authorship

Note: first authors that I assume identify themselves as female are highlighted in blue.

Total number of pages: 390
Justification for not reaching the recommended page count (1667): I keep them more than busy with other sorts of learning activities (e.g., group work, seminars, lectures). The activities I give them keep them busy 40 hours per week (as detailed in the schedule). If we decrease the reading (not the most active for of learning), then we need to cut down on the other learning activities.
