Total number of pages: students are not supposed to read all of the literature on this list. The list is meant to help the students in finding method literature.

Gender balance: The gender balance is female/male authors is ca. 30/70. Comment from the course coordinator (Anne Jerneck): We have tested this literature for several years and it seems to work well. We have added new titles over time, and whenever we have done so we have looked out for female scholars. If I were to produce a list of methodology literature in Swedish I could suggest more items by female scholars, some of which we suggest to Swedish speaking students.
