Course content

The course deals with grammatical concepts and structures found in the English language with the aim of improving the student's confidence and accuracy. This goal is reflected in the course material which both describes and explains various language structures. With the help of this material, the student carries out both analytical and practical exercises.

The course is divided into two components in so far as grammar and translation are assessed in two separate final exams.

Course design

Teaching consists of online material which the student works with independently, and independent study of the required reading. After each section the student completes a number of assignments which are then submitted.

The course is offered partially as a distance learning course and makes use of interactive information technology. It presupposes that students who enrol on the course understand these conditions and have access to a computer with internet connection. Further information is available from the department regarding technical requirements.

Assessment

The assessment is based on assignments that are to be submitted electronically and on two written exams on campus in Lund at the end of the course. The grades on the two exams are weighed together to determine the final grade on the course (see below).

Subcourses that are part of this course can be found in an appendix at the end of this document.

For a grade of Pass on the whole course the student must, in addition to having passed the assignments, have been awarded this grade on both exams.
