- integration of the fields strategic decision making and statistical methods at an organisational as well as individual level in organisations.
- trends in strategic decision making and the use of data and massive data for strategic decision making

Competence and skills
- show an ability to use data in strategic decision making
- can identify how data can be used as a support for organisations in strategic decision making
- apply statistial methods for analysing data as well as for critically assess and evalute data
- show the abilty to apply the knowledge of how data can be used for strategic decision making in an organisation

Judgement and approach
- are able to critically evaluate and assess possiblities and limitations of using data for strategic decision making in organisations
- are able to analyse and evaluate information and knowledge generated from data and "massive data"

Course content

The course "Business and Data Analytics" is developed as a response to the increasing need of people with a degree in business and management that understands and know how to use data including "massive data" for strategic decision making in organisations. To be able to work with data as a source of information supporting strategic decision making requires knowledge regarding how to understand how organisations can work with data and also critically analyse and assess knowledge generated from data and "massive data". To be able to critically assess and evaluate knowledge generated from data and "massive data" is a prerequisite for the ability to know how to use knowledge generated from data and how such konwledge can support strategic decision making in organisations.

During this course the students get to further their knowledge within the field of strategy, strategic decision making, statistial analysis and learning as well as to gain an understanding of how knowledge can be generated from data and also how to evaluate that knowledge.

Course design

The course consists of lectures, seminars and teaching cases. Parts of the course are mandatory. From the shedule students will be able to learn which part of the course that is mandatory.

Assessment

The course is examined through cases, hand-ins and an individually written examination.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

Subcourses that are part of this course can be found in an appendix at the end of this document.

Grades

Marking scale: Fail, E, D, C, B, A.
Grade (Definition) Points or % out of maximum points. Characteristic.

A (Excellent) 85-100. A distinguished result that is excellent with regard to theoretical depth, practical relevance, analytical ability and independent thought.

B (Very good) 75-84. A very good result with regard to theoretical depth, practical relevance, analytical ability and independent thought.

C (Good) 65-74. The result is of a good standard with regard to theoretical depth, practical relevance, analytical ability and independent thought and lives up to expectations.

D (Satisfactory) 55-64. The result is of a satisfactory standard with regard to theoretical depth, practical relevance, analytical ability and independent thought.

E (Sufficient) 50-54. The result satisfies the minimum requirements with regard to theoretical depth, practical relevance, analytical ability and independent thought, but not more.

F (U) (Fail) 0-49. The result does not meet the minimum requirements with regard to theoretical depth, practical relevance, analytical ability and independent thought.

Some occasional examination elements of the course may have the grading scale pass (D) / fail U(F).

Plagiarism is considered to be a very serious academic offence. The University will take disciplinary actions against any kind of attempted malpractice in examinations and assessments. The penalty that may be imposed for this, and other improper practices in examinations or assessments, includes suspension from the University for a specific period of time.

Entry requirements

1-30 HP in Business Administration completed as well as 15 HP in statistics. Students need to have been registered and actively followed courses in Business Administration 31-60 HP.

STA31 or STA36 or equivalent shall be completed.

Further information

In case of closure of the course: Within three semesters after the course closure there will be offered three additional occasions for examination of respective examination part of the course, for students with no successful result. Note that after this you can get a certificate only regarding completed examination parts.

Subcourses in FEKH30, Business Administration: Bachelor Course in Business and Data Analytics

Applies from H21

2101   Case 1, 2,5 hp
       Grading scale: Fail, E, D, C, B, A
2102   Case 2, 2,5 hp
       Grading scale: Fail, E, D, C, B, A
2103   Case 3, 2,5 hp
       Grading scale: Fail, E, D, C, B, A
2104   Written exam, 7,5 hp
       Grading scale: Fail, E, D, C, B, A
