

LUND
UNIVERSITY

Faculties of Humanities and Theology

KOGP07, Cognitive Science: Project, 7.5 credits

Kognitionsvetenskap: Projekt, 7,5 högskolepoäng

Second Cycle / Avancerad nivå

Details of approval

The syllabus was approved by The pro-dean for First-Cycle Studies at the Faculties of Humanities and Theology on 2010-06-24 and was last revised on 2017-08-10. The revised syllabus applies from 2017-08-10, autumn semester 2017.

General Information

The course is a compulsory component of the Master of Arts programme in Cognitive Science.

Language of instruction: Swedish

Main field of studies

Cognitive Science

Depth of study relative to the degree requirements

A1F, Second cycle, has second-cycle course/s as entry requirements

Learning outcomes

On completion of the course, students shall be able to

Knowledge and understanding

- describe examples of current research and development work in cognitive science
- describe how research and development work in cognitive science is conducted
- describe in detail a research method used in the field of cognitive science

Competence and skills

- work independently in a cognitive science project or other advanced activities
- participate in and contribute to research and development work in cognitive science or other advanced activities
- provide examples of the practical use of some of the quantitative and qualitative methods of the field of cognitive science
- use one of the quantitative and qualitative methods in the field of cognitive science

Judgement and approach

- assess the potential and limitations of different research methods
- assess the quality and relevance of research articles, documents and texts
- adopt a reflective and critical approach to their own and others' knowledge
- perceive and assess the value of acquiring more knowledge in the research field

Course content

The project course provides students with practical experience of participating in a research or development project and of the use of different methods in cognitive science. It provides experience of working with the different practical assignments included in a research or development project. The projects are selected among the ongoing research and development projects at the department or in external activities of relevance to cognitive science.

Course design

The teaching consists of project work and seminars. The student is to plan and lead seminars of their own and review and provide feedback on the work of fellow students.

Assessment

The assessment is based on a project report, review of other students' reports and an oral presentation.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

Subcourses that are part of this course can be found in an appendix at the end of this document.

Grades

Marking scale: Fail, Pass, Pass with distinction.

Entry requirements

To be admitted to the course, students must have completed KOGM01 and KOGP08 or the equivalent

Further information

1. The course is offered at the the Department of Philosophy, Lund University.
2. The credits allocated for course content that in whole or in part is commensurate with another course can only be credited once for a degree. For further details see the current registration information and other relevant documentation.

Subcourses in KOGP07, Cognitive Science: Project

Applies from V10

1001 Cognitive Science: Project, 7,5 hp
Grading scale: Fail, Pass, Pass with distinction
