

MVEP01, Environmental Science: Applied Work, 15 credits

Miljövetenskap: Praktik, 15 högskolepoäng

Second Cycle / Avancerad nivå

Details of approval

The syllabus was approved by Study programmes board, Faculty of Science on 2007-03-01 to be valid from 2007-07-01, autumn semester 2007.

General Information

The course is an elective second cycle course and may be included in a degree of Master of Science (120 credits) in environmental science or environmental and health protection.

Language of instruction: English and Swedish

Main field of studies

Depth of study relative to the degree requirements

Environmental Health

A1N, Second cycle, has only first-cycle course/s as entry requirements

Environmental Science

A1N, Second cycle, has only first-cycle course/s as entry requirements

Learning outcomes

The aim of the course is to enable students, on completion of the course, to have acquired the following knowledge and skills

- Preparedness for professional environmental science activities
- Experience from professional activities in the field of environmental science
- Opportunity to critically assess the work of environmental scientists in the field of the internship

Course content

The course consists of planning, execution and evaluation of an internship of 7-8 weeks at a workplace associated with the content of the student's training. A supervisor will be appointed at the workplace. The student is to keep a journal during the internship.

Course design

The course is to be planned and completed by the student in consultation with the course director and supervisor at the workplace. The student and supervisor are to draft a planning document and the student is to inform the course director about the progress of the internship within 2 weeks of its commencement. The student's journal is to be summarised in a written report to be submitted to the course director at the end of the internship. The supervisor is to submit a written certificate at the end of the internship stating whether the student has executed the internship satisfactorily.

Assessment

Subcourses that are part of this course can be found in an appendix at the end of this document.

Grades

Marking scale: Fail, Pass.

For a Pass on the course as a whole, the students must have their written report and supervisor's certificate approved by the course director.

Entry requirements

To be admitted to the course, students must possess knowledge equivalent to 75 credits in the main field of environmental science and/or environmental and health protection.

Further information

The course may not be included in degree together with internship in another subject or Internship MVE411, 15 credits
