

School of Economics and Management

## **NEKG81, Economics: Fixed Income Securities, 7.5 credits** *Nationalekonomi: Räntebärande tillgångar, 7,5 högskolepoäng* **First Cycle / Grundnivå**

---

### **Details of approval**

The syllabus is an old version, approved by The Board of the Department of Economics on 2011-06-07 and was last revised on 2019-11-05. The revised syllabus applied from 2020-01-20, spring semester 2020.

### **General Information**

This is a single subject intermediate course belonging to the 'Financial Economics' specialisation. The course is also an optional sub-course within NEKG11 'Economics: Level 2'. The course is optional within a number of undergraduate programmes at Lund University.

*Language of instruction:* Swedish

In some semesters the course can be taught in English, see the appropriate application catalogue.

*Main field of studies*

Economics

*Depth of study relative to the degree requirements*

G1F, First cycle, has less than 60 credits in first-cycle course/s as entry requirements

### **Learning outcomes**

#### **Knowledge and understanding**

Students shall have demonstrated a thorough understanding of how the fixed income markets function and shall have acquired the ability to explain the basic logic behind the models and analytical tools used by actors in the this market. Particular focus lies on Swedish fixed income markets. In addition, a special emphasis is put on the following topics:

- pricing of simple debt instruments such as bills, notes and bonds,

This is a translation of the course syllabus approved in Swedish

- the relationship between short-term and long-term interest rates,
- the relationship between forward and spot markets (fixed income),
- basic fixed income risk management,
- duration analysis,
- value-at-risk analysis
- the link between the foreign exchange market and the fixed income market,
- forwards and futures in the currency market,
- prediction of exchange rates,
- important relationships that describe the link between fixed income and currency markets in different countries,
- advanced fixed income and credit instruments and markets,
- credit risk.

### **Competence and skills**

Students shall have the ability to independently:

- structure and defend a complex theoretical argument,
- use theories and concepts to price simple fixed income instruments,
- use theories and concepts to manage the risk of simple fixed income instruments,
- explain important events in the fixed income market,
- use simple computer tools,
- report results in written form.

### **Judgement and approach**

Students shall have developed the ability to pursue further studies in the subject and should be able to search for and evaluate information with a high degree of independence.

### **Course content**

The course is divided into three parts. The first part contains a description of the Swedish fixed income market, where the function of basic fixed income instruments and markets is explained. In the second part students study the risk management of both individual fixed income assets and of portfolios of such assets. The third part treats the international fixed income market. The foreign exchange market and its link with the national fixed income markets are also discussed.

### **Course design**

1. Teaching: Tuition consists of lectures, exercises and computer exercises.

### **Assessment**

1. Examination: Written exams take place at the end of the course. There will be further opportunities for examination close to this date. The computer exercises will be graded, and the marks carried forward to examinations taken the same term. Other forms of examination may be used to a limited extent.
2. Limitations on the number of examination opportunities: –

The University views plagiarism very seriously, and will take disciplinary action against students for any kind of attempted malpractice in connection with examinations and assessments. Plagiarism is considered to be a very serious academic offence. The penalty that may be imposed for this, and other unfair practices in examinations or assessments, includes suspension from the University for a specified period.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

*Subcourses that are part of this course can be found in an appendix at the end of this document.*
