Language of instruction: English

Teaching may be in Swedish if all registered students have a good knowledge of Swedish.

Main field of studies

Finance

Depth of study relative to the degree requirements

A1N, Second cycle, has only first-cycle course/s as entry requirements

Learning outcomes

Knowledge and understanding

Students shall:

- have demonstrated knowledge of business valuation, especially in analysing the company's value creation, designing a valuation model, calculating the cost of capital, and evaluating, interpreting and presenting the results of a company valuation,
- have demonstrated knowledge of creating value, especially value-driver and measuring value Creation

Competence and skills

Students shall:

- have demonstrated the ability to identify problems and situations in which the studied theories and models can be applied,
- be able to communicate the results, their analysis and conclusions of an empirical investigation in a clear and concise way.

Judgement and approach

Students shall have demonstrated the ability to use theories and models for valuing companies and to analyze the company's value creation.

Course content

This course is about business valuation and how to measure and manage value creation. The course will make the participants familiar with different income and cash flow-based present value techniques to assess firm value. Participants will use financial data for business analysis and valuation. The ultimate test of a company's strategy is whether it creates economic value for shareholders. The course will make the students familiar with different models to measure value creation and will emphasise links between economic value creation and business valuation. Relative valuation is also covered. This is a common valuation technique where financial ratios used to derive business value. The course emphasizes developing the participants' skills in developing advanced models for evaluation in Excel.

Course design

1. Teaching: Tuition consists of lectures, exercises and work on practical problems.

Assessment

1. Examination: Examination consists of a written examination that takes place at the end of the course. There will be further opportunities for examination close to this date. In addition, there is an assignment dealing with the valuation of a real-world company. The valuation assignment is carried out in groups.
2. Limitations on the number of examination opportunities: –

The University views plagiarism and other academic dishonesty very seriously, and will take disciplinary action against students for any kind of attempted malpractice in connection with examinations and assessments. Plagiarism is considered to be a very serious academic offence. The penalty that may be imposed for this, and other unfair practices in examinations or assessments, includes suspension from the University for a specified period.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

Subcourses that are part of this course can be found in an appendix at the end of this

document.

Grades

Marking scale: Fail, E, D, C, B, A.

1. Grading: The official grading scale is A, B, C, D, E and Fail.

Grade (Definition), Points or percentage out of maximum points, Characteristic

A (Excellent), 85–100, A distinguished result that is excellent with regard to theoretical depth, practical relevance, analytical ability and independent thought.

B (Very good), 75–84, A very good result with regard to theoretical depth, practical relevance, analytical ability and independent thought.

C (Good), 65–74, The result is of a good standard with regard to theoretical depth, practical relevance, analytical ability and independent thought.

D (Satisfactory), 55–64, The result is of a satisfactory standard with regard to theoretical depth, practical relevance, analytical ability and independent thought.

E (Sufficient), 50–54, The result satisfies the minimum requirements with regard to theoretical depth, practical relevance, analytical ability and independent thought, but not more.

U (Fail), 0–49, The result does not meet the minimum requirements with regard to theoretical depth, practical relevance, analytical ability and independent thought.

Students have to receive a grade of E or higher in order to pass a course.

2. Weighting grades from different parts of the course: –

3. Grading scales for different parts of the course: –
