Course constitute degree project for Degree of Master (60 credits) in sociology.

*Language of instruction:* Swedish and English

*Main field of studies*

Sociology

*Depth of study relative to the degree requirements*

A1E, Second cycle, contains degree project for Master of Arts/Master of Science (60 credits)

### **Learning outcomes**

On completion of the course the students shall independently be able to

#### **Knowledge and understanding**

- demonstrate knowledge of theories and the construction of theory in the field of sociology
- demonstrate advanced knowledge in sociological methodology
- identify and formulate general sociological research problems
- assimilate, analyse, critically review and compare theoretical texts

#### **Competence and skills**

- plan and, using appropriate theories and methods, undertake and present an independent research project as well as evaluate their own research work

- perform a critical review of another independent research project
- present overviews of knowledge and research in the subject area
- demonstrate the ability to express and communicate acquired knowledge and skills both orally and in writing
- actively contribute with qualified points of view and participate in subject relevant discussions, both within and outside the university
- demonstrate knowledge about scientific channels of communication, and be able to monitor the academic development within their field of study

### **Judgement and approach**

- demonstrate the ability to make assessments in the main field of study informed by relevant disciplinary, social and ethical issues and also to demonstrate awareness of ethical aspects of research and development work
- demonstrate insight into the possibilities and limitations of sociology and its role in society
- identify the personal need for further knowledge and take responsibility for his or her ongoing learning

### **Course content**

The aim of the course is to provide students with advanced knowledge of sociological theory and research methods and a good ability to participate in research and development or work in other qualified contexts.

The main component of the course is the student's composition of a master's thesis. Major emphasis is placed on the student's ability to independently identify and formulate a sociological problem and actively follow the development and research in the field of enquiry. The course ends with final seminars, where the master's thesis is defended and each student critically reviews a fellow student's thesis.

### **Course design**

The student is entitled to supervision during the writing process. The supervisor provides the student with advice and views on the design of the thesis project, but the student is responsible for its completion. The period of supervision is limited to the semester when the student first registered for the course. Exceptions are only possible if there is a specific reason for this. The completed thesis is to be reviewed and discussed at a final seminar by a specially appointed critical reviewer.

### **Assessment**

The assessment is mainly based on the quality of the finished master's thesis, but also to some extent on the student's thesis defense and critical review of a fellow student's thesis.

The thesis is to be registered in an Open Access database belonging to Lund University. Each student determines their own level of publication.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

*Subcourses that are part of this course can be found in an appendix at the end of this document.*

## **Grades**

Marking scale: Fail, E, D, C, B, A.

The highest grade is denoted with A and the lowest grade for a Pass with E. The grade for a no pass is Fail.

The student's performance is assessed with reference to the learning outcomes of the course. For the grade of E the student must show acceptable results. For the grade of D the student must show satisfactory results. For the grade of C the student must show good results. For the grade of B the student must show very good results. For the grade of A the student must show excellent results. For the grade Fail the student must have shown unacceptable results
