Course content

Child psychiatry

Substance abuse

Psychiatric nursing

Psychopharmacology

Psychological and psychosocial treatment methods

Anxiety syndromes

Course design

The different working methods include individual work, group work, peer review, skills training, seminars and lectures.

Assessment

All assessment is carried out individually, based on established criteria. One regular exam and two resits are organised for each exam/course component. Students who do not achieve a Pass grade during any of these instances have the opportunity to take additional examinations. A student who has failed an examination twice is entitled to request that another examiner be appointed by the programme director or equivalent.

In the case of a resit, an individual exam may replace a group exam.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

Subcourses that are part of this course can be found in an appendix at the end of this document.

Grades

Marking scale: Fail, Pass.

For a pass on the course, the student must have passed all the assessed components.

Entry requirements

- Swedish professional status qualification as nurse and Degree of Bachelor of Science in Nursing with 180 credits including an individual assignment about 15 credits or equivalent
- Passed knowledge in Swedish and English that corresponds the requirements for general entry requirements at first cycle level
