Course design

The course is offered as either a distance learning or on-campus course. For further details, see the current registration information and other relevant documentation.

The teaching consists of exercises, lectures and seminars.

When the course is offered as a distance learning course, it makes use of an online learning platform, including scheduled real-time components. Students are required to participate under these conditions, and to have access to a computer with a web camera and an Internet connection. The department provides information on the technical requirements for participation in teaching and assessment.

Assessment

The assessment of the course is based on a written exam or camera-monitored written exam (5.5 credits) and an oral exam (2 credits).

When the course is offered as a distance learning course, live camera-monitoring takes place. No recording takes place. Supervision in real time is required in order to assess the student's knowledge without the student having access to any aids. The oral exam assesses the student's ability to participate in debates and discussions in Swedish within a given field.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

Grading scale includes the grades: Fail, Pass, Pass with distinction

For the grade of Pass on the whole course, students must be awarded this grade on both the oral and written exams. For the grade of Pass with Distinction on the whole course, students must also have been awarded this grade on at least 5.5 of the course credits.
