Required reading

Total number of pages: 639.

468 pages – academic peer-reviewed articles

48 pages – online non-academic articles

50 pages – reports (e.g. IPCC)

73 pages – books

Additional readings to be suggested by guest lecturers.

Rationale for not reaching the recommended amount: guest lecturers will provide additional readings, some of the readings (peer-reviewed articles)

are heavier in content, and the course includes assignments that will require the students to include further literature.

Author gender balance

42% female first-authorship (out of total number of publications) - with 2 publications with no main authors identified (e.g. UN Report and Paris Agreement). Female first author in **bold and underlined**.
