#### *Total number of pages*

423 pages – academic peer-reviewed articles

99 pages – online non-academic articles

90 pages – reports (e.g. IPCC)

119 pages – books

#### Additional readings:

**Tschakert, P.**, Ellis, N. R., Anderson, C., Kelly, A., & Obeng, J. (2019). One thousand ways to experience loss: A systematic analysis of climate-related intangible harm from around the world. *Global Environmental Change*, 55, 58–72. <https://doi.org/10.1016/j.gloenvcha.2018.11.006>

Other additional readings will be suggested by guest lecturers.

Rationale for not reaching the recommended amount: guest lecturers will provide additional readings, some of the readings (peer-reviewed articles) are heavier in content, and the course includes assignments that will require the students to include further literature.

#### *Author gender balance*

41% female first-authorship (out of total number of publications) - with publications with no main authors identified (e.g. IPCC Report and Paris Agreement). Female first author in **bold and underlined**.
