+ around 100 pages worth of blogposts, newspaper articles, websites and opinion pieces that will form the basis of discussions and seminars.

+ around 300 pages to be selected depending on topics of written group assignment and individual course paper.

+ around 250 pages on a climate fiction novel chosen by the students

Author gender balance

46% of publications have female scholars as their first author, and 60% have female scholars as either first or second author (including supplementary readings). Reports (such as the IPCC) for which no gender division can be determined are excluded from this calculation. The gender division is justified because our course textbook, which the students will read in its entirety, is authored by two female scholars.
