Total number of pages

847

Please note that the readings for this course are predominately peer-reviewed articles because the course is focusing on emerging trends and debates within four major themes in global health and sustainability. This requires a lot of case study readings and research articles from journals that include medical data and theory of a higher academic complexity, so this is why the total number of pages deviate from the guidelines given by the Faculty of Social Science at LU. Moreover, students will also be required to search for, read and cite additional peer-reviewed articles to fulfil the requirements for the course assignments: a group poster and a an individual paper.

Author gender balance

Female first authorship ratio: 34/67 (34 female, 33 male).

Female authors are highlighted in yellow.
